About

A Product/UX Designer with

- Focused on simplifying complex enterprise workflows and creating intuitive, user-centric digital experiences.
- I bring experience across FinTech, Insurance, Healthcare, Hospitality, and enterprise SaaS, combining user research, design thinking, information architecture, wireframing, prototyping, and analytical problem-solving.
- I enjoy translating complex business requirements into clear, efficient, and engaging experiences that improve usability while supporting business objectives.

Projects

B2B E-Invoicing Procurement

- Worked on a B2B FinTech SaaS platform focused on **procurement, invoicing, budgeting, and approval workflows**.
- Conducted research with 20 enterprise users and redesigned complex PR–PO–Invoice processes, reducing key workflows from **6 steps to 3**.
- Designed dashboards, approval matrices, budget hierarchies, and 3-way matching experiences to improve usability, efficiency, and audit visibility.

B2B and B2C Germany based Insurance Brokerage Platform

- **Insurance Digital Experience**
- Worked on UX/UI design for an Insurance-domain digital product, focusing on simplifying complex business processes and creating intuitive, user-centric experiences. Contributed to understanding business requirements, information architecture, wireframing, prototyping, and interface design while balancing user needs with enterprise and business objectives.
- The project involved translating complex insurance workflows and requirements into clear, efficient digital experiences, with an emphasis on usability, consistency, and reducing friction across key user journeys.

B2B Hospitality Management Platform

- Worked as Lead UX Designer on a multi-property **Hospitality SaaS and Revenue Intelligence platform** for hotel operations teams.
- Designed dashboards for ADR, RevPAR, Occupancy and revenue performance, along with AI-powered task management, operational alerts, exception handling, and revenue-leak detection.
- Focused on simplifying fragmented hotel operations data and turning it into actionable insights for General and Revenue Managers.
